SUBJECT INDEX, VOLUME 4

Acridine orange complex with poly-α,L-glutamic acid, electronic spectrum, optical activity, and structure, 97
Actomyosin formation, electrochemical aspects, 1046
Adenylic acid, cooperation in single-strand oligomers, 223
Aggregation effect on the optical rotatory dispersion of poly(α,L-glutamic acid), 653
Aggregation phenomena of collagen, 989
L-Alanine and L-glutamic acid oligomers and cooligomers, 275
L-Alanine oligopeptides, 305
Amino acids and peptides side groups, 495
Aminoacridines, interaction of, with deoxyribonucleic acid, 971
Aminoacridines bound to DNA, extrinsic Cotton effects of, 1073
V Amylose–water system, enthalpy of hydration on helix exterior, 677
Anionic depolarizer, transport of, through DNA, 705
Axial ratio related to the frictional ratio of an ellipsoid of revolution, 201
Band centrifugation, of macromolecules in self-generating density gradients, 131, 157, (*erratum*), 1055
  mathematics of, concentration-independent sedimentation and diffusion in shallow density gradients, 579
Bands, sedimentation and diffusion of macromolecules in (*erratum*), 1055
Band sedimentation, convection-free, 157
Base composition of intact nucleic acid oligomers, 759
Benzyl L-aspartate–nitrobenzyl L-aspartate copolymers, circular dichroism measurements, 607
α-Benzyl-L-glutamate *N*-carboxyanhydride polymerization, effects of conditions of polymer precipitation on the molecular weight distribution, 695
Biological activity regenerated by oxidation of fully reduced insulin, 351
Biological macromolecules, kinetics of synthesis and change, 3
  ultrasonic degradation under conditions of stable cavitation, 259
Birefringence and birefringence dispersion of polypeptides and proteins, 469
Calf thymus DNA, conformation of sodium and cesium salts, 429
N-Carboxyanhydride (MCA) polymerization initiated by strong base type initiators, 595
Chain effect, induction of secondary structure in copolymerizations, 1049
Charge density on native and ultraviolet-irradiated myosin A, 205
Circular dichroism measurements of benzyl L-aspartate–nitrobenzyl L-aspartate copolymers, 607
Collagen, aggregation phenomena of, 989
  soluble, interaction with cartilage proteinpolysaccharide during fibril formation, 247
  in solution from birefringence, 499
Comparison of synthetic dextran with a natural product by enzymic methods, 1043
Computation of sterically allowed conformations of peptides, 369
Conformational analysis of macromolecules, 237
Conformational change in poly-L-lysine on reaction with polyacids, 601
Conformational transition, of poly(L-glutamic acid) in aqueous solution, 529
  of proteins, "two-state" hypothesis for, 917
Conformations, polypeptide, standard conventions and nomenclature for (*erratum*), 1133
Conformations and interactions of excited states, model compounds for polymers, 1099
  polystyrene, polypeptides, and proteins, 1115
Convection-free band sedimentation, conditions for, 157
Cooperative interactions in single-strand oligomers of adenylic acid, 223
Copolymeric DNA equilibrium statistics, 855
Copolymerization, enzyme-catalyzed, on primers, steady-state kinetics, 683
  induction of secondary structure in, 1049

Copolymers, random, helix–coil transition, partition function for, 1025
Cotton effects, extrinsic, of aminoacridines bound to DNA, 1073
in random coil region of polyglutamic acid–acridine orange complexes, 949
Crystalline biopolymers, differential thermographic features, 215
C-terminal of the poly-γ-benzyl-L-glutamate helix, protonation by acids, 43
Cu(II)–poly(glumatic acid) complex in aqueous solution, 713
Cytosine, protonation of, in DNA, 1055
Denaturation and renaturation of DNA, 855
Denatured DNA, kinetics of renaturation, 171, 189
Density gradients, self-generating, band centrifugation of macromolecules in (*erratum*), 1055
Deuteration, infrared absorption spectrum of keratin, 561
and solvent composition effects in helix–coil transition of poly-γ-benzyl-L-glutamate, 1015
Dextran, synthetic, compared with a natural product by enzymic methods, 1043
Dielectric constant measurement study of helix–coil transition of DNA, 663
Differential thermographic features of some crystalline biopolymers, 215
Diffusion and sedimentation of macromolecules in bands (*erratum*), 1055
Dipeptide maps, influence of flexibility on energy contours, 709
Dipole moment, polarizability, and optical anisotropy factor of collagen in solution from electric birefringence, 499
Dispersion, optical rotatory, measurements of, 242
Disulfide linkage in protein structure, 737
DNA, in binding of silver ion, 17
calf thymus, conformation of sodium and cesium salts, 429
copolymeric, equilibrium statistics, 855
denaturation and renaturation of, 855
denatured, kinetics of renaturation of, 171, 189
extrinsic Cotton effects of aminoacridines bound to, 1073
helix–coil transition, study of, by dielectric constant measurement, 663
interaction with polynuclear aromatic hydrocarbons, 4-nitroquinoline 1-oxides, and various dyes, 409
pH-induced conformational changes of, 521
protonation of cytosine in, 1055
secondary structure of, changes in the stability by interaction with divalent metal ions, 321
synthesis of, electrophoresis of products of, 953
T-even bacteriophage, sedimentation coefficient, 747
ultrasonic degradation, of, 259
Electric properties of macromolecules, 499
Electrochemical aspects of actomyosin formation, 1046
Electro-optical studies of conformation and interaction of polynucleotides, 793
Electrophoresis of products of DNA- and nucleohistone-supported DNA synthesis, 953
Ellipsoid of revolution, axial ratio related to the frictional ratio, 201
Enthalpy of hydration on helix exterior, V amylose–water system, 677
Enzyme-catalyzed copolymerization on primers, steady-state kinetics, 683
Equilibrium and kinetics of the cooperative I $\rightleftharpoons$ II transition in poly-L-proline, 945
Equilibrium statistics of copolymeric DNA, 855
Ethane, propane, *n*-butane, and *n*-pentane, conformational analysis of, 237
Excited states, conformations and interactions of, model compounds for polymers, 1099
conformations and interactions of, polystyrene, polypeptides, and proteins, 1115
Fibril formation, interaction of soluble collagen with cartilage proteinpolysaccharide, 247
Film and solution, helix–coil transition of poly-L-lysine in, 1089
Flexibility, influence on the energy contours of dipeptide maps, 709
α-Helix in aqueous solution, stabilization by hydrophobic side-chain interaction, 365
Helix–coil transition, of DNA, study of, by dielectric constant measurement, 663
effects of pressure on, of the poly A–poly U system, 1063
of poly-γ-L-glutamate, 1015
of poly-L-lysine in film and solution, 1089

in polypeptides, solvent effects on, 815
of random copolymers, partition function for, 1025
for tropocollagen solutions, 957
Helix–random chain transitions of polyamino acids in organic acid–salt solutions, 637
Human hair, nuclear magnetic resonance of the state of water in, 1039
Hydrophobic side-chain interaction and stabilization of α-helix in aqueous solution, 365
Induction of secondary structure in copolymerizations, 1049
Infrared absorption spectrum of keratin, 539, 561
Infrared spectra of isotopic polyglycines, 337
Insulin, fully reduced, oxidation of, 351
Intact nucleic acid oligomers, base composition of, 759
Interaction, of aminoacridines with deoxyribonucleic acid, 971
and conformations of excited states, model compounds for polymers, 1099
and conformations of excited states, polystyrene, polypeptides, and proteins, 1115
during fibril formation of soluble collagen with cartilage proteinpolysaccharide, 247
of polynuclear aromatic hydrocarbons, 4-nitroquinoline 1-oxides, and various dyes with DNA, 409
specific, in proteins, due to proton fluctuations, 107
Intramolecular steric effects and hydrogen bonding in regular conformations of polyamino acids, 887
Ion binding in pepsin solutions, thallous ions, 85
Isotopic polyglycines, infrared spectra of, 337
Keratin, infrared absorption spectrum of, 539, 561
spectra of α-, β-, and supercontracted, 539
α-Keratins, low-sulfur proteins, interrelationships between their amino acid compositions, α-helix contents, and the supercontraction of the parent keratin, 905
Kinetics, of renaturation of denatured DNA, 171, 189
steady-state, of enzyme-catalyzed copolymerization on primers, 683
of synthesis and/or conformational changes of biological macromolecules, 3
Lamm equation, numerical solutions, equilibrium sedimentation, 457
numerical solutions, numerical procedure, 449
Low-sulfur proteins from α-keratins, 905
Measurements of optical rotatory dispersion, 242
Melting, thermal, of poly-L-alanine helices in water, 239
Mésure de la dispersion diélectrique en tres basse fréquence de solutions de DNA, 1035
Model compounds for polymers, 1099
Modification of space-filling atomic models allowing rapid and accurate assembly of polypeptide conformations, 1051
Mononucleosides and 5′-mononucleotides, optical rotatory dispersion of, 623
Myosin A, native and ultraviolet-irradiated, charge density on, 205
Nomenclature and standard conventions for polypeptide conformations (*erratum*), 1133
Nuclear magnetic resonance of the state of water in human hair, 1039
Nucleic acid oligomers, intact, base composition of, 759
Nucleic acids, 321
Oligomers, and co-oligomers derived from L-alanine and L-glutamic acid, 275
intact nucleic acid, base composition of, 759
single-strand, of adenylic acid, 223
Oligopeptides from L-alanine, 305
Optical rotatory dispersion, measurements of, 242
of mononucleosides and 5′-mononucleotides, 623
of poly-*O*-acetyl-γ-hydroxy-L-proline forms I and II, 509
of poly(α,L-glutamic acid), effect of aggregation on, 653
Oxidation of fully reduced insulin, 351
Papain derivatives, water-insoluble, 441
Partition function for helix–coil transition of random copolymers, 1025
Pepsin solutions, polarographic studies of ion binding, binding of thallous ions, 85

Peptides, computation of sterically allowed conformations, 369
pH-induced conformational changes of DNA, 521
Poly-*O*-acetyl-γ-hydroxy-L-proline forms I and II, optical rotatory dispersion, 509
Poly-L-alanine helices, thermal melting in water, 239
Polyamino acids, intramolecular steric effects and hydrogen bonding, 887
in organic acid–salt solutions, helix–random chain transitions of, 637
Poly A–poly U system, effects of pressure on the helix–coil transitions of, 1063
Poly-L-arginine synthesis, 91
Poly(A + U), poly(A + 2U), and rice dwarf virus RNA, 837
Poly-γ-benzyl-L-glutamate, in dimethylformamide, sedimentation and viscosity, 781
in helicogenic solvents, light scattering and osmometry of, 769
helix of, C-terminal of, protonation by acids, 43
Poly-γ-L-glutamate helix–coil transition, 1015
Poly(α,L-glutamic acid), effect of aggregation on optical rotatory dispersion of, 653
Polyglutamic acid–acridine orange complexes, Cotton effects in the random coil region, 949
Poly(L-glutamic acid) in aqueous solutions, 823
conformational transition, 529
Polyglycines, isotopic, infrared spectra of, 337
Poly-L-lysine, conformational change on reaction with polyacids, 601
helix–coil transition of, in film and solution, 1089
interaction with nucleic acids, 837
Polynucleotides, conformation and interaction of, 793
single-strand, neighbor–neighbor interactions, 33
Polynucleotide synthesis at oligomeric templates, 77
Polypeptide conformation, conventions and nomenclature for, 121, (*erratum*), 1133
modification of space-filling atomic models allowing rapid and accurate assembly of, 1051
Polypeptides, conformational aspects of, 275, 305
polystyrene, and proteins, 1115
and proteins, birefringence and birefringence dispersion of, 469
solvent effects on helix–coil transition of, 815
synthetic, solution properties, 769, 781
Poly-L-proline, equilibrium and kinetic studies of the cooperative I ⇌ II transition, 945
Polystyrene, polypeptides, and proteins, 1115
Poly U–poly A system, effects of pressure on the helix–coil transitions of, 1063
Potentiometric titration of poly(L-glutamic acid) in aqueous solutions, 823
Pressure, effects of, on the helix–coil transitions of the poly A–poly U system, 1063
Primers, enzyme-catalyzed copolymerization on, steady-state kinetics of, 683
Protein and nucleic acid sequences, reconstruction of, 723
Proteins, polystyrene, and polypeptides, 1115
"two-state" hypothesis for conformational transitions of, 917
Protein structure, topological considerations, 737
Protonation, of C-terminal of poly-γ-benzyl-L-glutamate helix by acids, 43
of cytosine in DNA, 1055
Proton fluctuations and specific interactions in proteins, 107
Random copolymers, helix–coil transition of, partition function for, 1025
Reconstruction of protein and nucleic acid sequences, 723
Renaturation of denatured DNA, 171, 189
Ribonucleic acids, transfer, 723
Ribonucleotide ApApCp, optical rotatory dispersion, 33
Secondary structure, induction of, in copolymerizations, 1049
Sedimentation coefficient of T-even bacteriophage DNA, 747
Sedimentation and diffusion, concentration-independent, in shallow density gradients, 579
of macromolecules in bands, 131, (*erratum*), 1055

Side groups in amino acids and peptides, 495
Silver ion, binding of by DNA, 17
complexes with natural and synthetic polynucleotides, 51
Single-strand polynucleotides, neighbor–neighbor interactions, 33
Sodium and cesium salts of calf thymus deoxyribonucleic acid (DNA), conformation studies, 429
Solution and film, helix–coil transition of poly-L-lysine in, 1089
Solution properties of synthetic polypeptides, 769, 781
Solvent effects, in *N*-carboxyanhydride (NCA) polymerization initiated by strong base type initiators, 595
on helix–coil transition in polypeptides, 815
Stabilization of the α-helix in aqueous solution by hydrophobic side-chain interaction, 365
Standard conventions and nomenclature for polypeptide conformations (*erratum*), 1133
Steady-state kinetics of enzyme-catalyzed copolymerization on primers, 683
Sterically allowed conformations of peptides, 369
Synthesis, of oligomers and co-oligomers derived from L-alanine and L-glutamic acid, 275
of poly-L-arginine, 91
Synthetic dextran compared with a natural product by enzymic methods, 1043
Synthetic polypeptides, solution properties of, 769, 781
Thallous ions, binding in pepsin solutions, 85
Thermal melting of poly-L-alanine helices in water, 239
Thyroglobulin properties, comparison of configurational states of reduced and unreduced, 999
Topological considerations in protein structure, 737
Transfer ribonucleic acids, 723
Transport of anionic depolarizer (Cu-EDTA) through DNA absorbed on a polarized mercury surface, 705
Tropocollagen solutions, helix–coil transformation, 957
"Two-state" hypothesis for conformational transitions of proteins, 917
Ultrasonic degradation of biological macromolecules under conditions of stable cavitation, 259
Water, state of, in human hair, nuclear magnetic resonance of, 1039
Water-insoluble papain derivatives, 441

Statement of ownership, management, and circulation (Act of October 23, 1962: Section 4369, Title 39, United States Code)

1. Date of filing: September 30, 1966

2. Title of Publication: Biopolymers

3. Frequency of issue: 10 issues per year

4. Location of known office of publication: 20th and Northampton Streets, Easton, Pennsylvania 18042

5. Location of headquarters of general business offices of publisher: 605 Third Avenue, New York, New York 10016

6. The names and addresses of publisher, editor, and managing editor:
Publisher: Eric S. Proskauer, John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
Editor: Murray Goodman, Polytechnic Institute of Brooklyn, 333 Jay Street, Brooklyn, New York 11201
Managing Editor: None

7. Owner: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
Stockholders owning or holding 1 per cent or more of total amount of John Wiley & Sons, Inc., stock as of September 30, 1965:
Cynthia W. Darby, 23 Farrington Street, Newburgh, N. Y.; Maurits Dekker, 511 West 232nd Street, Bronx, N. Y.; Rozetta S. Dekker, 511 West 232nd Street, Bronx, N. Y.; Ulia W. Gilbert, Box 1191, Carmel, California; Edward P. Hamilton, % John Wiley & Sons, Inc., 605 Third Avenue, New York 16, N. Y.; W. Bradford Wiley and Francis Lobdell, Trustees of Elizabeth W. Hamilton Trust, dated 12/23/52, % John Wiley & Sons, Inc., 605 Third Avenue, New York 16, N. Y.; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minnesota; Willy Levinger, 336 Central Park West, New York, N. Y.; R. R. Pennywitt, Box 211, Mantaloking, N. J.; C. R. Runyon, Jr., 130 East End Avenue, New York 28, N. Y.; Francis Lobdell and William J. Seawright, Trustees f/b/o Deborah Elizabeth Wiley, u/a dated 6/2/58, % John Wiley & Sons, Inc., 605 Third Avenue, New York 16, N. Y.; Francis Lobdell and William J. Seawright, Trustees f/b/o Peter Booth Wiley, u/a dated 6/2/58, % John Wiley & Sons, Inc., 605 Third Avenue, New York 16, N. Y.; Francis Lobdell and William J. Seawright, Trustees f/b/o William Bradford Wiley, 2nd, u/a dated 6/2/58, % John Wiley & Sons, Inc., 605 Third Avenue, New York 16, N. Y.; Adele E. Windheim, 8 Dundee Road, Larchmont, N. Y.; W. Bradford Wiley and E. P. Hamilton, Trustees for Edward P. Hamilton Foundation, u/a dated 12/23/57, % John Wiley & Sons, Inc., 605 Third Avenue, New York 16, N. Y.; Reing & Co., P. O. Box 491, Church Street Station, New York 8, N. Y.; Eric S. Proskauer and Charles H. Lieb, as Trustees u/a dated 11/27/62, 220 Central Park South, New York 19, N. Y.; Edward P. Hamilton, as Executor of the Will of Elizabeth Wiley Hamilton, dec'd.; Cynthia Darby and Julia Wiley Gilbert as Executors of the Will of Kate R. Q. Wiley; Edward Hamilton and Cynthia Wiley Darby as Trustees under Will of William Q. Wiley; American Growth Fund Limited, 7 King Street, E., Toronto, Ontario, Canada.

8. Known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None

9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiants full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 per cent or more of the total amount of the stock or securities of the publishing corporation.

10. This item must be complete for all publications except those which do not carry advertising other than the publishers own and which are named in Sections 132.231, 132.232, and 132.233, Postal Manual (Sections 4355a, 4355b, and 4356 of Title 39, United States Code)
I certify that the statements made by me above are correct and complete.
